Subject: RE: electronic GIS Files

That GIS data (data is the correct word...data comes in many forms 😊) would be in the form of shape files that should have been sent along with the hard drive with the site files. It's in a folder called "GIS Export" saved on 6/30/2020.

Jessica

I'm sorry I wasn't clear.[____]was looking for GIS data from Property 1, but I never "held"
That data. (Probably wrong term but hopefully you know what I mean)

Thanks
Chris

Hi [____]
I believe Weston used an ESRI app to collect data on property 3. I am working with both Weston and Colin to get the maps live on a Tetra Tech platform; the data has already been transferred to Tetra Tech. Colin will let us know when the data is available on ESRI.

I'm sure there are other maps that Weston created, but I'm not sure what the process is for transferring the actual shape files for those maps. This is why I prefer to use ESRI products. If you are looking for shape files other than the data collected on property 3, let me know and I will do my best to get the info from Weston.

Hi Jessica

Can you advise me on this? I Don't know that I have ever received GIS files from Weston in any of my sites. Have you?

Thank you for any advice you can provide
Chris

Hello Chris,

There should be a bunch of electronic files that were generated by Weston GIS personnel, some of which have ".shp" at the end of the file name – they are totally separate from the Scribe files. If you can't find them after this, then we will likely just have to go with re-creating the files as best we can. We are just trying to save some money where possible and not recreate things if we don't have to as well as being more accurate with site drawings and diagrams.

Regards,
